

APPENDIX A
CLEAN COPY OF THE AMENDED CLAIMS

Sub B1 A
Amended

1 1. An inkjet recording head, comprising:
2 a head body including:
3 a plurality of orifices;
4 a plurality of ink ejection units, each ink ejection unit arranged so as to correspond
5 to each of said plurality of orifices;
6 a plurality of individual ink flow paths, each individual ink flow path for
7 supplying ink to each of said plurality of orifices; and
8 at least one common ink flow path for supplying ink to said plurality of individual
9 ink flow paths; and
10 a metallic film at least on a part of at least one side of said head body.

Sub B1 A
Amended

1 3. The inkjet recording head according to claim 1, wherein
2 said plurality of orifices are formed on one side of the head body,
3 said each ink ejection unit includes an ink heating unit,
4 an ink supply bore hole for supplying ink to said at least one common ink flow path is
5 bored on a side opposite to an orifice forming surface of said head body, and
6 said metallic film is provided on the side opposite to the orifice forming surface of said
7 head body.

Sub B1 A
Amended

1 9. An inkjet printer using an inkjet recording head comprising:
2 a head body including:
3 a plurality of orifices;
4 a plurality of ink ejection units, each ink ejection unit arranged so as to correspond
5 to each of said plurality of orifices;
6 a plurality of individual ink flow paths, each individual ink flow path for

1 11. The inkjet printer according to claim 9,
2 wherein said plurality of orifices are formed on one side of the head body,
3 said each ink ejection unit includes an ink heating unit,
4 an ink supply bore hole for supplying ink to said at least one common ink flow path is
5 bored on a side opposite to an orifice forming surface of said head body, and
6 said metallic film is provided on the side opposite to the orifice forming surface of said
7 head body.
